

Marine & Leisure

Battery solutions

EQUIPMENT *Li-Ion*

BENEFITS

- › Ultra-lightweight : 50% lower weight and volume compared to standard batteries
- › Super-fast recharge: can be fully recharged in approx. 2 hours
- › Very low self-discharge: long shelf life and perfect for seasonal use
- › Integrated electronics (BMS) protecting the battery from several types of misuse (e.g. extreme voltage, low voltage, too high current)
- › Extreme cycle life : up to 2000 cycles
- › Multi-position mounting
